Dr. George Engelmann
3023 Locust St. St Louis

Dear Sir:

In the "Forest + Stream of August 4. '99 - I notice your interesting letter relating to the "Euphorbia Glyptosperma" - described as you state, in the Botany of the Mexican + Texas Boundary 1859 - Page 184" - I have Major Emory's "Boundary Survey vol. I Part I + II + am very desirous to get the Botany, if it is possible. I have resided here since 1865 + have much interest in the Flora etc. of the R. G. valley - a work from the hands of such men as Dr. Gray + Engelmann, would therefore be estimated highly by me - I would be grateful. if you would inform me if the work can be purchased, stating where + price, + if not to be purchased, if there is any way to get it from the U.S. Govt.

Respectfully Yours
F. E. Hance
